

CAMERON – PACE

Vince Pace

Co-Chairman and CEO, CAMERON – PACE Group

Vince Pace is Co-Chairman and CEO of CAMERON – PACE Group, a trend-creating technology and production services firm which provides 3D technology innovations that serve studios, filmmakers, directors of photography, producers, networks, studios and broadcasters.

An acclaimed cinematographer and co-inventor of the world's most advanced stereoscopic 3D system known as FUSION 3D, Pace has been a pioneer in reinventing the entertainment experience and has been instrumental in capturing some of the world's most captivating productions of our time. His career marks many significant achievements within the industry, from supporting the camera challenge of BBC's award winning series BLUE PLANET to designing innovative lighting technology for THE ABYSS and being nominated for an Emmy in Cinematography for bringing back images from the deck of the Bismarck, three miles under the ocean.

Almost a decade ago, Pace and Academy Award-winning director—and CAMERON – PACE Group Co-Chairman—James Cameron shared a desire to revolutionize the entertainment experience. Together, they embarked on a journey to develop the most advanced stereoscopic acquisition system ever created, known today as FUSION 3D. From 2000 to 2011, Vince Pace's company, PACE, housed a full creative and technical team which utilized the FUSION 3D system to infuse "Imagination through Innovation" into major motion pictures, live sports and entertainment experiences, concerts, music videos and more.

Today, CAMERON – PACE Group's solutions are trusted by the entertainment industry's leading filmmakers and other content producers. The use of CAMERON – PACE Group's FUSION 3D technology has resulted in over \$4.7 billion of box office receipts and is responsible for the most recognized 3D benchmarks in music entertainment, features, and sports including TRON: LEGACY, AVATAR, RESIDENT EVIL: AFTERLIFE, U23D, ESPN MASTERS, NBA FINALS AND ALL-STAR GAMES, JOURNEY TO THE CENTER OF THE EARTH, HANNAH MONTANA/MILEY CYRUS: BEST OF BOTH WORLDS CONCERT FILM and THE FINAL DESTINATION.

Based in Burbank, California, CAMERON – PACE Group pioneers the next generation of camera systems, services and a variety of creative tools to empower and enable the entertainment industry, filmmakers, networks and broadcasters as they move into the new world of 3D.
